PROFILE

Dynamic and creative frontend and backend developer with 3 years of experience delivering visually stunning and user-friendly digital experiences.

Passionate about leveraging design principles and technology to develop innovative solutions that meet the needs of clients and end-users. Eager to contribute my skills and expertise to a collaborative team.

WORK EXPERIENCE

2025 – Present
Mbeya

Web Developer (Freelance)

Web Developer

- Developed and maintained web applications using **Laravel, Next.js, React, PHP, JavaScript, MySQL, and PostgreSQL**.
- Built dynamic web platforms including **blogs, management systems, and portfolio websites**.
- Designed responsive and modern user interfaces using **HTML, CSS, Tailwind CSS, and React components**.
- Integrated **REST APIs and databases such as MySQL, PostgreSQL, and Supabase** for efficient data management.
- Implemented **full-stack functionality**, connecting frontend interfaces with backend services.
- Tested, debugged, and optimized applications to improve **performance, usability, and security**.

12/2025 – 02/2026
Mbeya

Anaby Green Company Limited

Full Stack Web Developer

- Developed the official company website using **Laravel, MySQL, Tailwind CSS, and Livewire**.
- Designed responsive and modern user interfaces to improve user experience across devices.
- Implemented backend functionality for managing website content and system features.
- Integrated database structures using **MySQL** for efficient data storage and retrieval.
- Tested and optimized the website to ensure performance, reliability, and security.

07/2025 – 12/2025
Mbeya, Tanzania

Mbeya University of Science and Technology (MUST)

Full Stack Developer (Team Project)

- Collaborated with a team of developers to design and develop **Project Hub**, a system for managing finalist student projects at MUST.
- Built responsive and modern user interfaces using **Next.js and React**.
- Integrated **Supabase (PostgreSQL)** as the backend database for managing projects, users, and submissions.
- Implemented features for **project submission, supervision, evaluation, and project tracking**.
- Used **Git and GitHub** for version control and collaboration during team development.

07/2024 – 09/2024 Mbeya, Tanzania	Tested and improved the system to ensure performance, reliability, and good user experience.
	Tanzania Telecommunication Corporation Limited (TTCL) Network Support Intern - Assisted in configuring and maintaining network devices and communication systems. - Supported data management and system monitoring activities within the organization. - Participated in network installation, maintenance, and troubleshooting tasks. - Gained practical experience in ICT infrastructure, networking, and technical support.
07/2023 – 09/2023 Mbeya, Tanzania	Mbeya Urban Water Supply and Sanitation Authority (MBEWASA) GIS Expert (Intern) - Collected, analyzed, and maintained GIS data related to water supply infrastructure. - Created and updated digital maps for monitoring water assets and infrastructure. - Supported water supply and sanitation projects through spatial data analysis. - Generated reports, maps, and data visualizations to assist in project planning and decision-making. - Ensured accuracy and proper management of geospatial data and infrastructure records.

EDUCATION

2022 – 2025 Mbeya, Tanzania	Bachelor of Computer Science (BCS). Mbeya University of Science and Technology (MUST)
	Diploma in Information and Communication Technology (DICT). MBEYA UNIVERSITY OF SCIENCE AND TECHNOLOGY (MUST)
2019 – 2022	
2015 – 2018 Kilimanjaro, Tanzania	Certificate of Secondary Education Examination (CSEE) Nyerere Secondary School

PROJECT EXPERIENCE

2024 – 2025	Clearance Management System 🔗 Web-Based Clearance and Payment Management System - Developed a Clearance Management System to automate clearance processes for institutions. - Built the system using Laravel, PHP, MySQL, and modern frontend technologies. - Integrated PalmPesaTZ mobile money payment gateway to enable online clearance fee payments. - Implemented secure authentication and role-based access control for system users. - Designed responsive user interfaces using HTML, CSS, and Tailwind CSS. - Created backend APIs and database logic to manage clearance records, payments, and student data. - Tested and optimized the system to ensure secure transactions, reliability, and performance.

2024 – 2025

Zoo Management & Surveillance System

AI-Powered Camera Surveillance & Management Application

- Developed a **Zoo Management & Surveillance System** integrating **real-time animal monitoring** using YOLO (You Only Look Once) object detection.
- Built the application to process live or recorded security camera feeds to **detect and track animals** in different zoo zones.
- Implemented the **YOLO model** to identify animal movement and alert system components for monitoring tasks.
- Integrated web interfaces to display **camera streams, detection results, and surveillance dashboards**.
- Utilized **Python and deep learning libraries** (such as OpenCV and TensorFlow/PyTorch) for **model inference and video processing**.
- Designed backend logic to store detection logs and support queries for analysis and reporting.
- Ensured the system delivered **accurate detection and efficient performance** suitable for real-world zoo environments.

2023 – 2023

Off-Campus Student Management System

Web-Based Student Off-Campus Records and Management Platform

- Developed a **web-based Off-Campus Student Management System** using **PHP, MySQL, and core web technologies (HTML, CSS)** to support university administrative tasks.
- Built a **user authentication system** with secure login functionality for different user roles including **Admin, Student, and Warden**.
- Implemented **role-based access control** to direct users to their respective dashboards based on account type after login.
- Designed database schemas and queries to **manage student records, off-campus status, and user accounts** using MySQL.
- Created responsive and organized user interface layouts using HTML and CSS for intuitive navigation.
- Tested and debugged login mechanisms and data interactions to ensure stability and correct user routing within the system.

2022 – 2022

Product Expiry Management System

Web Application for Tracking and Monitoring Expiry Dates of Products

- Developed a **web-based Product Expiry Management System** using **PHP, MySQL, and CSS** to help hospitals, dispensaries, and medicine sellers monitor product expiration dates.
- Built functionality to **capture product details, expiry dates, suppliers, and inventory information** for medicines and other perishable goods.
- Implemented **automated alerts and notifications** to inform authorities when products are approaching or past their expiry dates, helping improve **patient safety and inventory accuracy**.
- Designed intuitive interfaces for data entry, expiry tracking, and reporting to support efficient inventory oversight by medical staff.
- Organized and optimized database queries to ensure **fast lookup and reliable alert generation** for high-risk inventory items.

Skills	
• PHP	• Laravel
• React / NextJs	• NodeJs
• Flutter	• MySQL
• PostgreSQL	• Firebase
• Git & Github	• Figma & Adobe XD
